ACCESSING SOFTWARE

software.utah.edu

ADOBE LICENSE CHANGES

All eligible University of Utah community members who wish to use Adobe products are required to activate a new software license, which remains free to students taking for-credit classes and full-time faculty and staff.

Eligible Adobe product users are asked to evaluate their university-related needs and obtain the minimum software that supports them. UIT recommends Adobe Express Premium for most users.

CONNECTING TO WI-FI

onboard.utah.edu

UConnect is a secure, 5GHz connection meant for phones, laptops, and tablets that requires a valid uNID login.

UGuest is a less secure, open-access network for campus and hospital visitors who need temporary access.

ULink is the university's wireless network for Internet of Things (IoT) devices, such as PlayStation, Xbox, Roku, Chromecast, etc., that requires a valid uNID login.

Eduroam allows students, faculty, and staff from participating institutions to obtain internet connectivity on campus, at Salt Lake Community College's Herriman campus, and at other participating institutions.
