

IBM software audit survey - your response needed for compliance

You're receiving this email because you're subscribed to UIT's public email list.

IBM is auditing The University of Utah regarding campus-wide usage of its software products, including operating systems, utilities and languages, middleware, and applications, such as:

- [SPSS Statistics](#)
- [SPSS Amos](#)
- [Cognos Analytics](#)
- [AppScan](#)
- [QRadar](#)
- Thousands of others. For IBM's complete software catalog, [please refer to the company website](#).

In order to comply with IBM's audit requirements, we need your help to identify the types of IBM software currently in use at the U.

Please complete this brief survey so that we provide accurate information to IBM for audit purposes. The survey has 3 questions and should take 3-5 minutes to complete.

[Respond to the survey](#)

The survey will close on Friday, September 27, 2019.

We appreciate your assistance in this data collection effort. If you have any questions, please contact University of Utah Deputy Chief Information Officer Ken Pink: ken.pink@utah.edu.

Please forward the survey to others at the university who may be using IBM software.
Thank you.
