ISO announcement: Johansen promoted to associate director level
New role begins on 11/15/19

UIT is pleased to announce that Jake Johansen has been promoted to associate director for enterprise security within the Information Security Office, effective Friday, November 15, 2019. He will report to Chief Information Security Officer Corey Roach.

"Jake has excelled as a top-tier security architect and engineer. He has the respect of security professionals throughout the campus and the state," Roach said. "It's exciting to see him take on this new role as a leader and mentor. I'm confident he will rise to the challenge, and he'll make an even more significant contribution to improving information security at the University of Utah."

Jake Johansen, associate director for enterprise security

For the past 16 years, Johansen has served various security-related roles at the U, most recently as a senior data security analyst on the Enterprise Security team, where his work entailed incident handling and response, digital and network forensics, penetration testing, vulnerability management, and risk analysis, among other responsibilities.

As associate director for enterprise security, Johansen will serve as the intermediary between the CISO's strategic and process-based policies, and the technology-focused activities of IT analysts, engineers and system administrators across campus and University of Utah Health. He will also oversee the process of gathering, analyzing, and assessing current and future information security threat landscapes; hire, train, and manage staff; and actively participate in the IT security governance process, among other things.

Johansen is a certified information systems security professional (CISSP) and certified HIPAA professional (CHP).

Please join us in congratulating Johansen on his promotion.
