Fifteen campus buildings will undergo a planned network switch upgrade on Monday, November 6, 2023, from 12:00 a.m. to 1:00 a.m. This is an update of a previous announcement.

Maintenance requires each switch to go offline while the upgrade is applied. Each switch will take approximately 15-20 minutes to upgrade and reboot, which includes verification of normal operations. Because wireless access points connect to the switches, wired and wireless network access will be unavailable during the upgrade.

A list of impacted buildings is available in Box (login required).

Additional announcements related to this project, including building lists, will be distributed at a future date.

If you have questions, your local IT support staff may be able to assist, or you may contact your respective help desk: UIT Help Desk (801-581-4000) or ITS Service Desk (801-587-6000).

Please visit the University IT Services Status page for information during this and future maintenance events.
