Strategic IT Committee
September 18, 2018
Winder Boardroom, Park Building
Agenda

1. Identity and account access
2. UMail authentication plan
3. Software Anywhere recommendation
4. Open floor
1. Identity and account access

Chris Stucker, associate director for Identity and Access Management, will facilitate a discussion on the number of accounts the university has provisioned and specifically talk about the high number of users who have never logged in. The committee may be asked for a recommendation on how to resolve this issue.

This can be a discussion item or an action item.
2. UMail authentication plan

Mike Ekstrom, director for Network and Communications Infrastructure, and Dave Packham, manager for UMail & Collaboration, will present a proposal to change the Outlook Web App login page (https://www.umail.utah.edu) to the university’s single sign-on Central Authentication Service (CAS) page. This proposal was already presented and approved at the August ANTC meeting.

This is an action item.
3. Software Anywhere recommendation

The Software Anywhere subcommittee has met a number of times since the group was first approved in January 2018 by ANTC. Ken Pink, Deputy CIO, will represent the subcommittee and present recommended next steps for SITC to consider. The full recommendation document is available in Box.

This is an action item.
4. Open floor

Any issues that need to be discussed here publicly before we next meet?
